Prep for Success in Connected & Hybrid Learning Spaces

Technology Solutions Guide

DTEN All-in-One Technology for educators and students help to maintain focus and foster collaboration in remote and hybrid learning environments with intuitive devices that are **Simple to Use**, **Easy to Set Up**, and **Affordable**.

DTEN helps to enable successful hybrid learning environments and productive meeting spaces:

- Encourage Student and Faculty Participation
- Improve Technology Adoption
- Create New Learning Opportunities
- Teach to Every Learning Style
- Focus on What Matters Most

Prepare for the Future of Education with Hybrid Learning and Connected Learning Spaces

The IT imperative has always been to evaluate, assess and select technology that facilitates communications between faculty, staff, administrators and parents.

- **Ensures student learning outcomes are met and student development is supported**
- **Enables the classroom teacher to deliver impactful instruction**
- **Enhances natural teaching styles for faculty, students and administrators**
- **Maximizes technology investments while leveraging existing equipment and teaching aids**

The IT Challenge

Facilitate Collaboration and Communication

Support teachers to deliver more impactful instruction

Ensure positive learning outcomes and student development

Teach from and to anywhere with simple and intuitive solutions

Create the Ideal Hybrid Learning Environment

- Promote participation with digital whiteboarding and easy control of Zoom class sessions
- See every student in high definition with spacious 4K displays
- Hear and be heard clearly with DTEN Audio AI

Deliver Immersive Lesson Plans and Multimedia Presentations

- Illustrate ideas and lesson plans with digital whiteboarding
- Built-in smart camera and smart framing technologies keep you perfectly in frame for dynamic presentations
- Easily share content from external PCs, document cameras and other peripherals

Simple

- Quick hassle-free setup, right out of the box
- Intuitive menu design and one-touch to start Zoom meetings
- Plug it in and it just works

Flexible

- Easy deployment with central device and user management by IT Admin
- Wireless or Ethernet connectivity at home and in the classroom

Powerful

- All-in-one devices include camera, microphone, speaker and operating systems
- Brilliant touchscreen display with built-in digital whiteboard and annotation tools

Connected Learning
Success Story

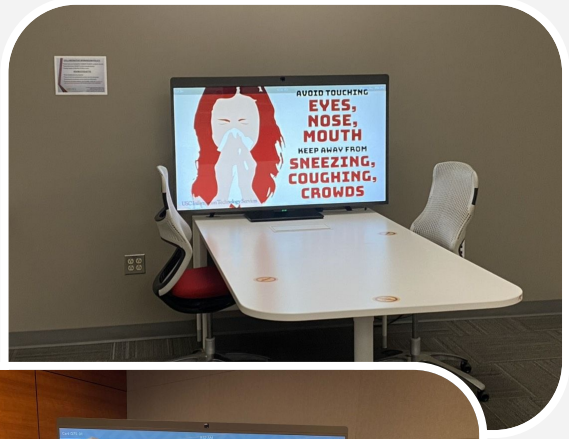

University of Southern California (USC)

USC was looking for a simple, effective and easy-to-use solution for digital whiteboarding, video conferencing and interactive collaboration.

DTEN Solutions allowed for easy adoption of digital collaboration and teaching programs, and kept remote students and faculty engaged.

- Focus on delivering a consistently high-quality teaching and learning experience in executive offices, study rooms, meeting spaces and executive offices
- Already looking to upgrade classrooms, offices and meeting spaces when Covid-19 Struck
- Has deployed the DTEN D7X, DTEN ONboard, DTEN ME Pro throughout and faculty offices

"We requested some DTENs for campus as trials. We plugged the first one in our office and it just worked. And we knew almost immediately that these DTEN units would be going everywhere, because it solved the problem."

Joe Way, Phd, CTS, EdTech Thought Leader

Connected Learning
Success Story

University College Dublin (UCD)

One of Europe's leading research-intensive universities, UCD is among the education institutions that have chosen DTEN solutions to standardize their hybrid meeting rooms, enabling staff and students to connect seamlessly from over 70 rooms.

UCD opted for both 55" and 75" screen sizes to suit their requirements of 70+ rooms, ranging from small huddle room spaces to large conference rooms.

- UCD Chose DTEN for simple and intuitive product design and built-in integration with Zoom Rooms and Google Calendar
- Technology adoption among faculty and local room manager was very low because they were already familiar with Zoom
- DTEN's plug-and-play solutions allowed IT staff to equip up to 5 rooms in a day, saving costs and reducing risks associated with multi-component systems

"For ease of use, management of the facility and integration with our Zoom environment, the DTEN solution stood out."

Brian Morrissey, Head of Enterprise Applications at University College Dublin, IT Services

Hybrid Classroom

Blended Learning Rooms

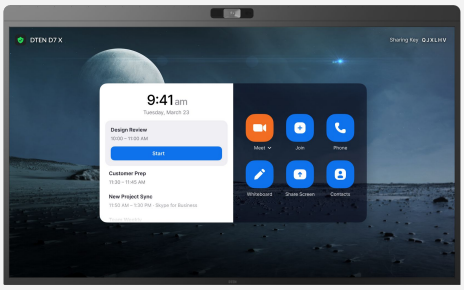

Connect students at home and in class with a dual-device setup including DTEN D7X and the DTEN ONboard companion whiteboard.

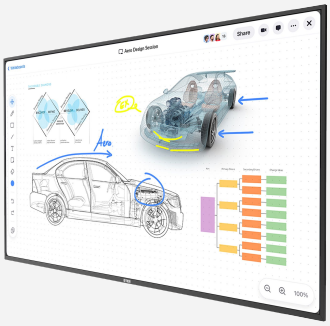

Popular with K-12 and Higher Ed, the deployment of a second device in-line with student desks provides a natural learning environment and in-classroom experience for students at home.

Recommended Hardware:	**DTEN D7X 55”/75” DTEN ONboard 55”**
Recommended Room Size:	**Small to medium size 15-25 students**
Great for:	**Total student engagement including students at home**

DEVICE SOLUTION

Hybrid Classroom

Lecture Hall / Large Classroom

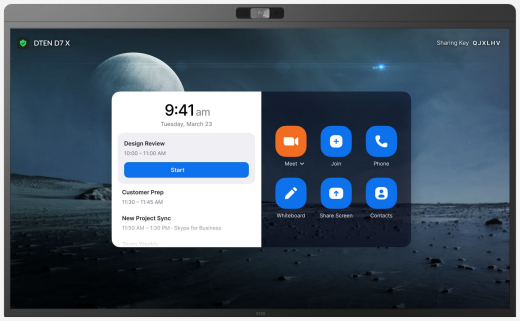

For larger classrooms and lecture halls, the **DTEN D7X** can be connected to a video projector or larger room video system, allowing natural instruction at the front of the classroom while engaging a larger body of students, whether in the hall or remote.

Session recordings and digital lesson plans may be easily shared with students for asynchronous learning.

Recommended Hardware:	DTEN D7X 75” DTEN Mate Room Controller
Recommended Room Size:	Larger Sized Rooms Lecture Halls
Great for:	Natural instruction at front of room Engaging remote students

Connected Learning Success Story

University of Chicago (UChicago)

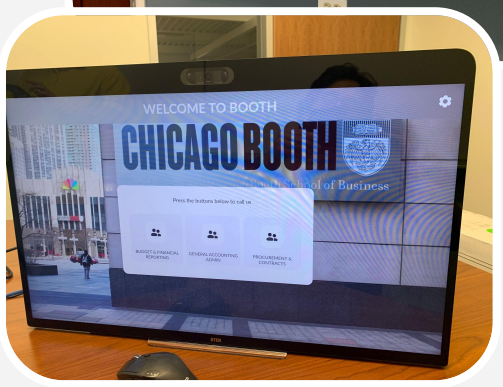

UChicago has a mix of teaching spaces that range from small huddle rooms, larger, discussion seminar rooms, lecture rooms, and large auditoriums.

Among the criteria for selecting video conferencing and collaboration solutions, ease of deployment, easy adoption and remote management were of top priority.

Ultimately, UChicago opted for DTEN all-in-one solutions for in Zoom-native classrooms and faculty offices as the learning curve for students and faculty was very low.

- Having both Ethernet and WiFi connectivity available to DTEN solutions offered extra deployment flexibility
- Technology adoption among faculty and local room manager was very low because they were already familiar with Zoom
- Remote management through DTEN Orbit allowed a small IT team to manage over 30 systems across campus

We found the DTEN to be a very low learning curve for non tech savvy faculty. They could keep their chalkboard teaching style and easily share all the writing materials after the class or office hour sessions.

Marlon Aguilar, AV Technology Manager, UChicago
